

SUPPLEMENTARY MATERIALS

Table S1*Factor loadings of specific well-being scales*

| Emotional well-being | Loading | Social well-being | Loading | Psychological well-being | Loading |
|----------------------|---------|-------------------|---------|--------------------------|---------|
| Life satisfaction | .69 | Integration | .76 | Acceptance | .87 |
| Happiness | .88 | Acceptance | .63 | Relations | .52 |
| Positive affect | .84 | Contribution | .62 | Autonomy | .54 |
| Negative affect | -.60 | Actualization | .58 | Environmental | .86 |
| | | Coherence | .47 | Growth | .63 |
| | | | | Purpose | .87 |
| | | | | Eudaimonic | .77 |

Table S2*Relations of specific well-being scales to the general factor of personality (GFP)*

| Emotional well-being | GFP | Social well-being | GFP | Psychological well-being | GFP |
|----------------------|------|-------------------|-----|--------------------------|-----|
| Life satisfaction | .52 | Integration | .62 | Acceptance | .69 |
| Happiness | .66 | Acceptance | .38 | Relations | .54 |
| Positive affect | .67 | Contribution | .59 | Autonomy | .43 |
| Negative affect | -.50 | Actualization | .34 | Environmental | .68 |
| | | Coherence | .34 | Growth | .51 |
| | | | | Purpose | .64 |
| | | | | Eudaimonic | .61 |

Note. All correlations are significant at $p < .001$.
