Note: ZKA-PQ/SF – Zuckerman-Kuhlman-Aluja Personality Questionnaire shortened form; BIS-11 – Barratt Impulsiveness Scale; IGD-20 – Internet Gaming Disorder-20; $r = .05$ or higher $p < .05$; $r = .08$ or higher $p < .01$; $r = .10$ or higher $p < .001$. According to the Bonferroni adjustment ($0.001/17 = 0.00006$). Corrected correlation > 0.13 are significant ($p < .001$). Strong correlations ≥ 0.15 in boldface.
