

APPENDIX 3

Means, standard deviations, correlation coefficients between variables and Cronbach's alpha coefficients

Variables	<i>M</i>	<i>SD</i>	1.	2.	3.	4.	5.
1. Depression stigmatization	19.24	6.71	(.80)				
2. Need for cognitive closure	62.44	12.33	.17**	(.85)			
3. Level of exposure	8.66	3.63	-.20**	.02			
4. Materialism	61.92	16.98	.30**	.26**	-.03	(.92)	
5. Age	27.21	9.73	.15*	.17**	-.10	-.22**	
6. SES	6.47	1.39	.10	-.12*	-.02	.10	.00

Note. * $p < .05$, ** $p < .01$, one single tailed. SES – socioeconomic status. Internal consistency alphas are displayed in the diagonal; $N = 224$.
